Claims 1-19 have been canceled in the Preliminary Amendment submitted June 14, 2005. Claims 20-38 are pending and presently under consideration in this application.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 20-38 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The steps by which the values for adsorption to each of the {111} crystal faces and the {100} crystal faces are determined are critical or essential to the practice of the invention, but not included in the claim(s). See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 20-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 fails to particularly point out and distinctly claim the steps by which the values for adsorption to each of the {111} crystal faces and the {100} crystal faces are determined; reference to the "Kubelka-Munk method as described in T.TaniJ.Imag.Sc" is inappropriate.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

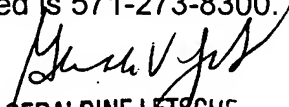

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 20-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Elst et al. (European Patent No. EP1178353).

Elst et al. discloses a photographic material comprising a support having thereon at least one layer comprising a {111} tabular silver halide emulsion comprising at, said {111} tabular silver halide emulsion having a silver bromide content of at least 50 mole%, said emulsion prepared by a process wherein the aqueous salt solution is formed in the presence of a water-soluble polymer compound inclusive of the instant claims. It would have been obvious to one of ordinary skill in the requisite art at the time the invention was made to maximize the adsorption value of the polymer to the {111} crystal faces to achieve the optimum results.
